I. INTRODUCTION

A. PURPOSE

The New Mexico Finance Authority (“NMFA”) hereby requests proposals from qualified firms (“Offerors”) to provide a risk rating platform and related services, as more specifically outlined in Section I(C) of this Request for Proposal (“RFP”).

B. BACKGROUND

1.0 NMFA and Portfolio. The NMFA was created by the New Mexico State Legislature in 1992 to finance infrastructure projects for the state’s counties, cities, school districts, public utility providers and certain departments of state government. The objective was, and remains, to provide low-cost financing for borrowers who might not otherwise be able to access the tax-exempt and taxable bond market on a cost-effective basis. Since then, the mission of the NMFA has expanded to include several private or commercial lending programs, in addition to its bond-based lending and water infrastructure-based loan and grant programs. Currently, the NMFA manages sixteen active programs, primarily divided between loans made to i) public borrowers for primarily infrastructure purposes and ii) private businesses for primarily economic development purposes. That said, many of the NMFA’s public loans have commercial like attributes, including those made to finance hospitals, health care providers and hotels. Total assets are roughly \$3B. The PPRF loan portfolio is set out in detail at the following link, <https://www.nmbondfinance.com/new-mexico-finance-authority-investor-relations-nm/i1204>). The overall portfolio includes:

- ~ \$2B, or 1,100 of Public Project Revolving Loan Fund (“PPRF”) loans;
- ~ \$680M, or 528 Water Project Finance (“WPF”) loans;
- ~ \$300M, or 187 Drinking Water State Revolving Fund (“DW”) loans;
- ~\$247M, or 329 Colonias Infrastructure Board (“CIB”) loans comprising;
- ~\$150M, or 50 Private, commercial loans, economic development-based loans; and
- ~ \$168M, or 2,450 Private, COVID-19 recovery loans.

2.0 NMFA Process/Systems. The NMFA has a robust underwriting protocol and loan approval process that includes both internal and external Board and committee reviews. For the majority of the public loans, the NMFA currently utilizes EnABLE as its sub-ledger of record, as well as acting as its depository for loan applications and loan write-ups. On the private side, application intake is performed through Formstack, Salesforce and email. CashSuites is used to analyze financial information and generate loan write-ups. Salesforce and Tableau are both used for reporting purposes throughout the NMFA portfolio. The NMFA may be migrating to different base systems in the next few years.

C. SCOPE OF PROCUREMENT

The NMFA seeks to streamline and modernize its credit and risk rating methodology. In addition, the NMFA seeks to use such methodology to characterize and monitor risk on a proactive basis, with the ability to assign appropriate ratings to its existing portfolios, and to be

able to stress test its portfolios. The services required to be provided to the NMFA under a contract awarded pursuant to this RFP shall include, but are not limited to, the following:

1.0 Risk Rating Scorecards

1.1 Develop between 8 to 15 customized Risk Rating scorecards. The scorecards would form the basis for NMFA’s risk rating system and would be created in a customizable manner either by loan type, credit type and loan program. The scorecards would also serve as the baseline and guiding factors for on-going loan monitoring.

1.1.1 Collaborate with stakeholders to identify needed scorecards.

1.1.2 Collaborate with stakeholders to identify key elements to each scorecard.

1.1.3 Collaborate with stakeholders to properly weight each element.

1.1.4 Test elements to validated outcomes.

1.1.5 Scorecards should be intuitive and provide built-in instructions or standard operating procedures to guide staff as scorecards are completed.

1.2 Have appropriate technology (i.e. open API) allowing the Scorecards to be integrated into NMFA systems.

1.2.1 Integrate risk ratings and key elements into write-ups that are presented to committees and the NMFA Board.

1.2.2 Integrate into NMFA reporting systems for on-going monitoring and portfolio reporting.

1.2.3 Integrate into NMFA loan and reporting software– i.e. EnABLE, Cash Suites, Salesforce, and Tableau.

2.0 Existing Portfolio Classification

Apply risk ratings/scorecards to existing portfolio in a “bulk scorecard process”. This may be performed on a loan type/credit type/project type basis or on an aggregate portfolio basis depending on difficulty, timing and cost.

3.0 Stress Testing

Based on Risk Ratings and classification, a system should have the ability to stress test the NMFA’s portfolios under historical, hypothetical, and simulated scenarios.

4.0 Forecasting/Monitoring/Reporting

4.1 Provide the ability to forecast credit, loss potential and other risks based on the Risk Rating of NMFA loans and portfolios.

4.2 Provide the ability to dissect and monitor key risks based on the Risk Rating of NMFA loans and portfolios.

4.3 Have robust reporting and data analytic capabilities, either on its own or by integration with Tableau.

5.0 Related Policies and Procedures

Advise the NMFA on the development or modification of relevant policies and procedures to account for the Risk Rating methodology and related testing, including but not limited to, loan approvals, loan underwriting, on-going monitoring, portfolio construction, and adjusting/setting loan-loss reserves.

6.0 Data Management/Accessibility/Security

6.1. Provide an integrated solution for use and storage of the Risk Rating scorecards, their use and all related data.

6.2 Provide a flexible solution for data access via mobile devices, remote, etc.

6.3 Provide ability for version control, speed and efficiency to access key documents and data.

6.4 Account for best-in-class storage and security of data.

6.3 Meet the following specific security requirements:

6.3.1 SaaS

6.3.2 Azure AD Sync

6.3.3 MFA Capabilities

6.3.4 Encrypted Storage

6.3.5 Encrypted Transport

7.0 Training and Implementation

7.1 Assist NMFA management in implementing the Risk Rating methodology, policies and procedures developed as a result of the described services.

7.2 Develop and provide initial training to NMFA staff to implement the Risk Rating methodology, policies and procedures developed as a result of the described services.
