

QUESTIONS & ANSWERS TO REQUEST FOR PROPOSALS

DIGITAL TRANSFORMATION IMPLEMENTATION TECHNICAL PLANNING AND CHANGE MANAGEMENT SERVICES

DATE RFP ISSUED: April 17, 2025

DATE OF ANSWERS: April 29, 2025

Question 1: Is there only one primary vendor that this project will be awarded to?

Answer: Yes, one primary vendor.

Question 2: Will the NMFA publish a list of preferred vendors we can contact for potential subcontracting opportunities?

Answer: No. And subcontracting will not be allowed for the technical and change

management phase.

Question 3: In general, what are the onsite requirements for this project if any? What will be the

typical weekly cadence and what tools will be used?

Answer: TBD. Flexibility for on-site visits required. NMFA uses Click-Up and Sharepoint

to manage projects. At a minimum, weekly project status updates will be

required.

Question 4: What current ticketing system is being used for activities such as project

management, user stories, acceptance criteria, test cases, and deliverables?

Answer: Click-Up

Question 5: What enterprise architecture methods does the NMFA anticipate using if any such

as Zachman or TOGAF?

Answer: The organization has not formally adopted an EA method.

Question 6: Is there flexibility with experience requirements for both the vendor and/or the lead

consultant?

Answer: The adequacy of the experience requirements will be reflected in the

evaluation score for evaluation criteria #4

Question 7: Are there other software packages that will be implemented in the near future that

vendors need to take into consideration.

Answer: A3 FP&A Solution for Risk Rating Project

Question 8: What is the budget for this project?

Answer: \$250k for the technical and change management planning only

Question 9: What is the anticipated timeline?

Answer: Late May through August - for the technical and change management

planning only

Question 10: Will there be any implementation work done on this project for now, or will this be

a future item?

Answer: Future – starting Fall 2025

Question 11: Are stakeholders involved more technically oriented or business/functional

oriented?

Answer: Both. The project owner and staff are technically oriented. Other

department SME's will be business/functional

Question 12: Does the NMFA have Salesforce, Sage Intacct, and IvyTek Loan Management

Software currently implemented

Answer: Salesforce is partially in place for limited client application intake. Sage

Intacct and IvyTek Loan Management are to be implemented as part of the

project

Question 13: Could you please confirm the correct proposal submission deadline? Section II.A

(Sequence of Events, page 9) indicates May 9, 2025, while Section II.B.4 (Submission of Proposal, page 10) states that proposals must be submitted no later

than 4:00 PM MDT on May 2, 2025.

Answer: May 9, 2025. 4pm

Question 14: What other systems, beyond IvyTek Loan Management and Sage Intacct ERP,

does NMFA need to integrate with? What types of data will be exchanged, and what platforms or technologies host the target systems?

Answer: Potential integration points are A3 FP&A, and DBC by SSC&T Technologies.

Question 15: Can you elaborate on the digital systems expertise of key stakeholders? Do they have prior experience with CRMs, ERPs, and Loan Management Software?

Answer: Overall, the agency has limited experience with CRM. The key stakeholders have extensive experience with the features required in ERP and Loan Management software. However, the current environment of systems does not include open API

or AI, aka lacks modernization.

Question 16: What is the current governance structure for digital transformation initiatives? What is

the size and scope of NMFA's IT and Cybersecurity departments, if any?

Answer: There is a Project Owner (Chief Innovation Officer) and independent Project Officer (Chief Technology Officer), reporting to a Project Steering Committee

comprised primarily of Senior Leadership.

NMFA's Dept. of Information Systems (DIS) is composed of 3 System Administrators overseeing Tier 1 and Tier 2 systems and security unrelated to ERP and Loan Mgmt. DIS also has 4 System admins supporting Salesforce, Loan Mgmt and other operational systems. Both teams are supported by a Technical Operations Manager and Product Owner.

Both of these teams are likely to continue to support NMFA during implementation but also receiving training to support the future state maintenance requirements. There is a possibility the Salesforce team will participate in the implementation.

Question 17: To strengthen our understanding, could you provide more details on current business processes, systems, and data structures across NMFA's loan programs?

Answer: Please visit nmfinance.com for in-depth information about NMFA and its programs.

Additional documents pertaining to the technology solution RFP containing

capability maps and requirements also provided.

Question 18: Which data classification and protection regulations apply to NMFA? Are there any

Answer: Internal classifications informed by standard protocols **Question 19:** Does NMFA serve customers outside of the State of New Mexico? Outside the United States? **Answer:** All financed projects are in the State of New Mexico. Some projects may have applicants with headquarters in other states. What are NMFA's data residency requirements? Must corporate and customer data **Ouestion 20:** remain onshore, nearshore, or on-premise? Answer: **Onshore or nearshore Question 21:** Does NMFA have a preferred ETL (Extract, Transform and Load) tool or middleware platform currently in use or approved for future use? **Answer:** Currently using SQL Server and Saleforce. Also exploring Microsoft Power Platform. **Ouestion 22:** What are some success metrics that NMFA plans to use to evaluate the program's effectiveness? Answer: For the planning portion the success metrics will be completion of the deliverables identified in the scope. Success metrics for the implementation phase should be created in concert with the Project Owner, Project Advisor and Steering Committee during the planning phase.

What are the auditability requirements for systems, processes, or data handling at **Ouestion 23:** NMFA? SOC 1 and SOC2 certified and following the CIS framework. The NMFA is moving Answer: towards ITGC and ITAC standard frameworks. System Auditability will also necessitate system/data change/audit logs, monitoring tools, data auditability (classification/DLP) - change mgt and RBAC. **Question 24:** What are NMFA's requirements for data archival, including retention periods and storage formats? **Answer: See NMFA Document Retention Schedule** Question 25: To enhance operational efficiency, will consultants receive access to NMFA's communication and file-sharing platforms, such as MS Teams, Outlook, and SharePoint? To Teams and SharePoint. Outlook TBD **Answer:** Question 26: Will change management efforts focus solely on internal staff training and communications, or do they include external non-NMFA stakeholders (excluding customers) as well? Should government employees or elected officials also be regularly informed and included in release communications and updates? Primarily internal staff. The Change Management Plan will be executed by an **Answer:** internal team, supported by Change Management professionals during

implementation.

Question 27: Are there any anticipated requirements for real-time data reporting in the near future?

Answer: Real-time reporting on project implementation status is required, i.e. current

backlog and iterations in Click-Up. Real-time reporting is a requirement of all features in future state integration i.e. CRM pipeline, application status, financial

reporting etc.

Question 28: To what extent are the Finance, HR and Program Management business functions separated into separate departments? Are the roles and responsibilities for these functions cleanly split between separate departments with separate executive reporting lines?

Answer: Please visit <u>Staff | New Mexico Finance Authority</u>

Question 29: What are the names or functional descriptions of the sub-departments that comprise the Program Management function?

Answer: Credit, Lending, Public Program Administration, and Economic and Community

Development

Question 30: Can you provide an organizational chart of executive leaders and their departments and teams? For each Capability diagrammed, can you indicate which department or team would be the primary owner of the business process that the capability enables?

Answer: Not currently available as described. Can be developed with the winning vendor

Question 31: Based on your current impressions, which five of the diagrammed Capabilities do you expect will provide the most strategic benefit? Which Capabilities are stakeholders most excited to see realized?

Answer: Strategic benefits: Financial Reporting, Impact Measurement, Pipeline

Development, Recruitment, Training

Excitement generating: Client Application Mgmt, Project Mgmt, Loan Servicing, real time reporting and all automation

Question 32: Based on your current impressions, which seem to be the greatest barriers to the organization's ability to adopt transformation? Have there been challenges faced with similar initiatives in the past, or concerns for the future? How might challenges vary between departments?

Answer: All organizations face challenges with these types of initiatives. Challenges

primarily fall into two categories; 1 - ensuring the features provide value and help staff complete their tasks, 2 - competing priorities are effectively aligned with

implementation to avoid delays, rework and burnout.

Question 33: Over the coming two years, what is the expected Change Environment for the organization generally and for different departments specifically? Aside from the digital transformation, does the organization (or any specific departments) expect to undergo any other major regulatory, strategic, people, technology or process changes? If yes, please summarize extent and timing of change impacts, to help us understand the change load that people will be experiencing.

Answer: As of June, the organization is moving into a new building. Parallel projects include

a Credit Risk Rating project primarily impacting the Credit team. There is also a transition from on-premises file sharing to Sharepoint as part of a larger data and

document mgmt. project.

Question 34: What are your expectations, goals or pressures relating to the Duration of this initial planning phase? What is the availability commitment of executive sponsors, leading managers and subject matter experts for this initial planning phase?

Answer: This planning phase should take 12-16 weeks. Executive sponsors, leading

managers and SME's can be available as necessary with appropriate 2-3 week advance notice. One competing activity will be financial audit work impacting the Finance department. However, the work completed to date in the solution selection should allow for consultants to be highly productive with minimal interaction with

department SME's.

Question 35: What are your expectations, goals or pressures relating to the Duration of the digital transformation's implementation in its entirety, as well as for any specific sub-parts? Are there any

roadmap phasing ideas that you are already seriously considering?

Answer:

The implementation phase will last 12-24 months depending on resources and alignment with competing work. Goals include; minimal disruptions, high adoption rate, and delivering incremental value on a quarterly basis. The roadmap phasing has not been seriously considered because up until now we have not been in a position to align the features necessary against on-going agency activity.

Question 36: Does the organization's Program Management, Finance and HR roles all operate fully on-site? If no, can you provide a general description of how hybrid or remote arrangements function, only to help us understand stakeholder engagement possibilities.

Answer: NMFA is a hybrid work environment with 3 days required on-site.

Question 37: Will the organization dedicate the hours of any in-house learning and development coordinators, trainers, internal communications, business analysts or HR managers to own a specialist role in the transformation? More generally, does the organization have expectations about how many of the 80 impacted staff will have time allocated to act as change champions?

Answer:

NMFA is committed to creating an internal Change Management team. During implementation feature SME's and members of the Department of Information Systems will help as change champions. In addition all levels of management need to be provide with tools and techniques to be effective change champions.

Question 38: Having completed the product assessments and made selections, can you help us understand which product is expected to fulfil each of the requirements listed in the business requirements spreadsheet? Similarly, can you share any notes about the assessed extent of customization or configuration required from each product to fulfil each requirement?

Answer:

Salesforce for CRM, IvyTek (a managed application built on Salesforce) for Loan and Grant Mgmt, and Sage Intacct for ERP (GL, AP/AR, Financial Reporting, HCM/Payroll)

Question 39: Can you share any notes about your expectation of which information flows will be facilitated by the integration?

Answer:

All related loan and grant serving data that impacts the financial statements, account (i.e. clients or vendors) and contact data

Question 40: Can you describe the commitments received from the selected product partners to engage in and support this initial planning and design phase?

Answer:

Both vendors have provided informal commitments to this process. Formal commitments TBD and contingent on awarding planning RFP.

Question 41: Can you share the Comprehensive Needs Assessment and any supporting documentation such as completed Current State assessments, stakeholders, personas, journeys, process flows, lists of existing information technology applications being used for different business functions, or Future State business process flows?

Answer: See capability and system journey maps provided.

Question 42: Can you describe the business process scope of the existing Salesforce application, and any active integrations?

Answer:

The existing Salesforce application is being used to process client applications for 2 new programs aimed at economic and housing development. Salesforce is also being used in conjunction with SQL as part of the ETL process for existing data. Salesforce is integrated with Formstack for Salesforce, and a dormant Bank Connect product.

Question 43: To what extent do you expect the initial digital transformation program to modify the scope of the business functions that each staff member performs or the management structure through which staff report?

Answer:

It is unclear if this question is asking for the impact during the implementation or after. If during, staff will be devoting between 5%-25% of their time away from normal business functions to participate in the project. When the project is

complete it is anticipated that front line staff will reduce time spent on manual work by ~50%, and~25% by managers. No change in mgmt. structure has been contemplated.

Question 44: If changes are expected in staff roles or management reporting structures, to what extent have these changes already been planned, and will these changes require the organization to engage in group bargaining with represented employees?

Answer:

No planning has taken place yet, as such an analysis is dependent on future state process/system mapping. NMFA will have to engage in group bargaining.

Question 45: Is the work expected to be done with US-based resources, or can the work be supported by other Geographies, such as India or Central America?

Answer: US based resources preferred for coordination purposes, but flexibility exists.

Question 46: Is there a timeline for the completed assessment?

Answer: 12-16 weeks

Question 47: What groups will participate, and what groups have approvals of current state assessment and future state assessment and roadmap?

Answer: Project owner and Steering Committee

Question 48: What is the primary technology for the future state? Is it Salesforce CRM as the Hub?

Answer: Salesforce and Sage Intaact

Question 49: Can you describe the existing comprehensive needs assessment and any other existing artifacts from the evaluation thus far that would be available to us to start the project?

Answer: Initial requirements list, solution selection artifacts, journey capability and systems maps

Question 50: Has the board approved a budget for the project (both the planning phase and subsequent implementation)? If not, when is the targeted board meeting for approval?

Answer: Planning budget approved. Project budget to be included in FY2526 budget

Question 51: Can you describe the Board's intended level of engagement throughout the planning and implementation phases?

Answer: Primarily in the informed role. In the planning phase there is a possibility of board

engagement in a consultative role which would require more time, but not a

significant amount.

Question 52: Can you confirm if the proposal response deadline is 5/9/2025 or 5/2/2025 as stated in

section B.4?

Answer: 5/9/2025

Question 53: Technical Architecture and Design

What are NMFA's current data classification and retention systems and methods? Previously answered

What are NMFA's requirements for security and compliance requirements? Previously answered

What tools are used for ETL processes? **Previously answered**

2.b. Are there any specific data privacy regulations that the new systems must comply with? **Previously answered**

Answer:

Question 54: Salesforce

Can you describe all the NMFA processes that exist in Salesforce today (example: Lead Process, Opportunity, Quoting, Case Submission)? **Previously answered**

Can you provide documentation of processes and customizations currently in Salesforce? **To the winning vendor**

What integrations do you have now into or out of Salesforce? Do you have any integration middleware that you already have purchased (ie Mulesoft, Celigo, Workato, Boomi)? Integrations previously answered. We previously worked with TIBCO. Currently we have a custom interface through bulk API. Looking a MS Power Platform connectors as well.

How many Salesforce users do you have today and what departments/divisions (e.g., operations employees, sales employees, etc.) are in Salesforce today? To varying degrees Finance, Credit, Lending, Program Administration, Department of Information Systems.

Answer:

Currently ~ 50 active users

Question 55: Sage Intacct

Can you provide a copy of any RFP, requirements, or relevant use cases or information leveraged for the selection of Sage Intacct: **Provided**

How many roles currently exist in the finance department? 6

What is the legacy financial system for the general ledger? MIP by Community Brands How many users are in that system? ~ 20

What systems feed into the general ledger today and anticipated integration in the future? None today. Future state Salesforce, Clearwater Analytics, bank feed

Which modules are you considering for your Sage Intacct subscription? **Details to be provided to winning vendor**

Answer:

Question 56: Implementation Roadmap Development

- 3a. What is the targeted timeline and start date to execute the planning and preparatory phase?
- 3b. What is the anticipated implementation timeline including target start and end dates?
- 3e. Could you provide us with an organizational chart?
- 3h. Are there conflicting projects (e.g., audits, other technology implementations, etc.) on the organization roadmap which could put the resource allocation, timeline, etc. at risk for the planning and preparatory phase and the subsequent building/implementation phase?

Answer:

Question 57: Digital Change Management Services

- 4.1a. What departments are impacted within the approximate 80 employees across multiple departments?
- 4.1a. Are you able to provide the external stakeholder groups? What is the approximate count of external (e.g., borrowers, state agencies) stakeholder groups affected?
- 4.1b. How does NMFA adapt to change today? What are some of your change management processes conducted today?
- 4.1b. Do you anticipate resistance from certain stakeholder groups for this implementation? If so, who are those?

Answer: 4.1a – All of them

4.1a(2) - \sim 2500 clients, \sim dozen state agencies; list to be provided later

4.1b – NMFA has a strong culture united around its mission and that significantly supports change management. NMFA often relies on traditional methods of managing change via established relationships, written and verbal communication.

Ouestion 58: Governance and Readiness Assessment

5.a. What team members will be part of the planning and preparatory phase from NMFA, what will their anticipated roles be, and how much time are they anticipating allocating to this initiative?

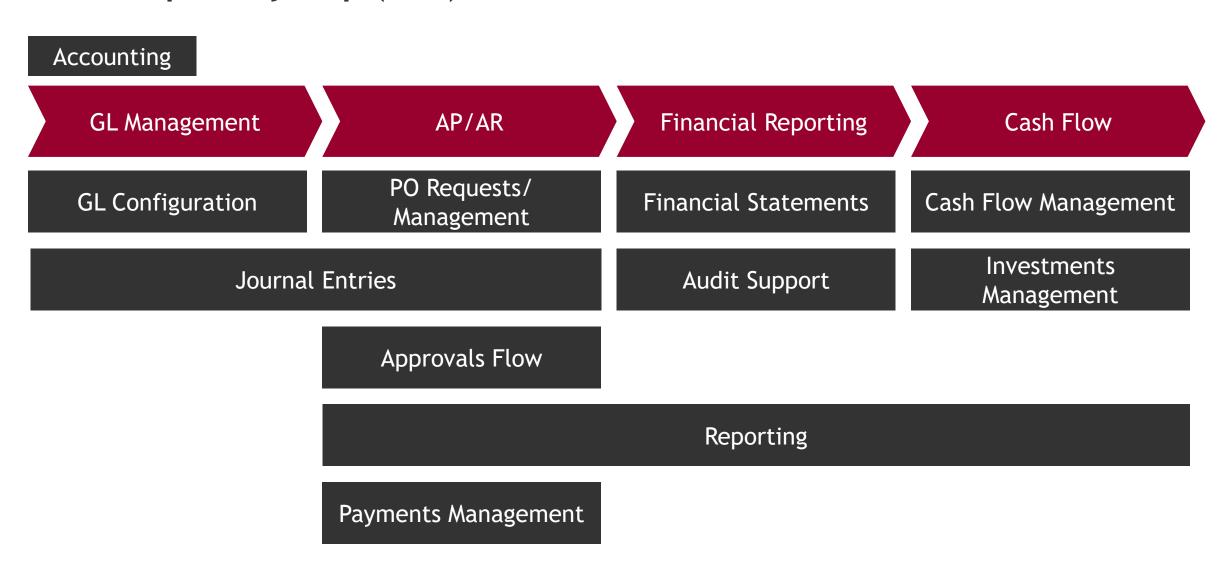

Answer: Previously Answered

Key Observations

Summary of Observations (II/IV)

Program Management

Loan Servicing

Project Mgmt.

Impact Measurement

Loan Maturity

Programs

- Accounting
- Client Services
- Credit
- Overlap in teams/ roles with lack clarity on responsibilities
- Complex manual processes to manage draw, repayments and reimbursements
- No integrations across loan management and accounting systems
- No self-serve capabilities for borrowers to submit draw requests and manage their loans
- Data inconsistency and inaccuracy across platforms which results in manual data manipulation

Programs

- No centralized project and milestone tracking to manage budget, timelines and manage draw eligibility
- No milestone-based funding to prevent fraud and drive compliance
- Inefficiencies in capturing compliance reporting as well as automating the process with borrowers

- Programs
- Client Services
- Credit
- · Leadership / Board members
- Impact measurement KPIs are not understood or standardized across programs
- No standardize measurement processes or reporting available

- Client Services
- Legal
- Accounting
- Lack of standardized process for monitoring loans and credit monitoring
- No tracking of historical loans and loan lifecycle

Key Observations

GL Management

AP / AR

Financial Reporting

Cash Flow

Accounting

Accounting

Accounting

- Treasury
- Accounting

 Setting up and configuring changes in the GL (i.e. addition of segments) is complex

- Current GL hierarchy does not support all of NMFA's data and reporting requirements
- Reporting capabilities are not flexible and typically will require external data manipulation
- Manual and complex processes to create and approve journal entries with no systems integrations

- Purchase order system is in its infancy and not fully utilized / rolled out to all departments
- Vendor list is not well managed and accessible for teams to access
- Process for PO request to procurement is not consistent or standardized and is managed across multiple systems
- No centralized and consistent way to generate financial reports - manual manipulation is required
- Collaboration, tasks and handoffs within teams are tracked manually with no automation and reminders
- Lack of precise cash flow forecasting tools
- No integration and automation between investment transactions and accounting systems for journal entries
